

Osaji

BERRIES FOR HEALTH & WELL-BEING

Osaji is specially formulated from a type of natural plant called Sea Buckthorn (*Hippophae rhamnoides L.* berries) grown on the plateaus of Tibet. It is extracted from the fruits of Sea Buckthorn. The pure Sea Buckthorn oil is produced using physical separation methods to maintain its quality. Sea Buckthorn oil is rich with nutrients and contains Vitamin E, Vitamin C, Vitamin B, unsaturated fatty acids, essential amino acids and flavonoids.

What is Sea Buckthorn?

Sea Buckthorn is one of the oldest wild plants found on the earth. Sea Buckthorn has a very high adaption level. It tolerates extreme high and low temperatures, it is able to grow on dry, wet or sandy soil. The fruits of Sea Buckthorn are rich with various nutrients.

Sea Buckthorn is well-known for its traditional medicinal value. The Tibetans and Mongolians have been using them widely. In the current days, modern research has shown that Sea Buckthorn carries functions which assist in lowering cholesterol level and reducing risks of cardiovascular and coronary symptoms.

Benefits of Osaji :

- Helps in reducing risks of cardiovascular and coronary problems
- Boosts metabolic rate and immune system
- Helps in lowering cholesterol level and serum lipids
