

K♦eWRIST BAND

A BAND FOR
HEALTHY
LIFESTYLE

With the hectic lifestyle in the modern days, it is not easy for us to maintain a healthy lifestyle. We are exposed to various unwanted pollutants. Such environment causes the existence of free radicals on our whole body. Free radicals are positively charged ions which can cause fatigue and premature ageing. Free radicals can be avoided by using products which can neutralize the positive ions.

What are the benefits of K♦eWRIST BAND ?

K♦eWrist Band is a high technology product that helps to:

- Improves blood circulation
- Improves body health
- Alleviates discomfort
- Prevents fatigue
- Increases physical flexibility

The main compositions of K◆eWRIST BAND and how they help us :

NEGATIVE IONS

It helps to neutralize positive ions (free radicals) in the body which cause pain and fatigue. It also helps to reduce the viscosity of blood by separating the clustered red blood cells to increase oxygen supply, eliminating stress and alleviating tensions and anxiety. It is good in helping to stabilize the autonomic nervous system by balancing activities of sympathetic and parasympathetic nerves.

FAR INFRARED RAYS

It produces "resonance effect" in the body to enhance the metabolism of the body & improve blood circulation.

What is "Resonance Effect"?

Water and organic substances absorb energy easily from Far Infrared Rays (FIR).

FIR absorbs easily into our body and simultaneously, activates the water molecules in the body.

The active molecules increase blood circulation and help to enhance the body metabolism.
