# K-eSOCKS

## NEGATIVE-ION / FAR INFRARED

### Bacteria-resistant to prevent foot odour

K-eSocks are made of pure cotton and are embedded with Bio-Ceramic which emits far infrared rays and Bio-Energy. The far infrared rays and Bio-Energy can penetrate deeply into the sensitive part of our soles and promote blood circulation. It also helps prevent bacterial growth, eliminate foot odour and itchiness.

**K-eSocks is an anti-bacterial health socks that helps to maintain the health of the feet. Below are some of the functions of K-eSocks:**

- Promote blood circulation and enhance the constitution and health of the human body
- Effectively alleviate cramps
- Prevent bacterial growth and eliminate foot odour and itchiness
- Absorb sweat effectively and maintain the dryness and comfort of the feet
