How does K-Liquid Mixed Collagen Drink work?

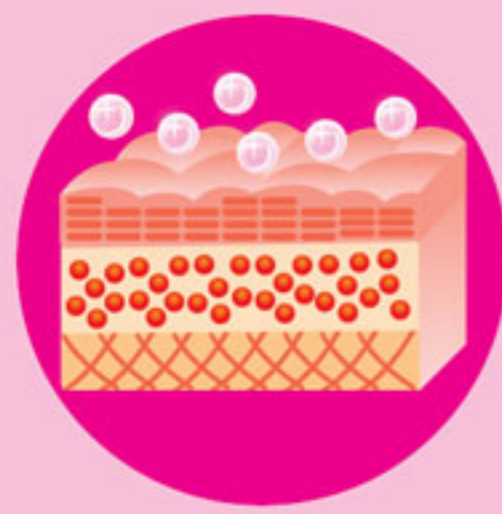

Necessary Drink for Youthful Skin

Collagen covers 30% of the whole protein content in the body. It is found in the whole body and organs like our bones, cartilage bones, ligaments, blood vessels, skin and other parts. Its main functions are regaining the tautness, moisture and shine of the skin as well as maintaining the structure and shape of our internal organs. Besides that, it is also an essential ingredient for regenerating damaged tissues.

Tests and researches found that collagen in the body deteriorates after the age of 20 - 25 years old. Therefore, appropriate intake of collagen daily is necessary.

The Importance of Collagen to the Body :

Skin

Layer of skin tissues contain 70% collagen. The main functions of collagen are slowing down the ageing process, anti-wrinkle and improving skin moisture.

Bones and Joints

80% of collagen is found in the human bones. Collagen promotes tissue growth of the joints and improves smoothness of joints to help relieve joint pain.

3 Types of Main Ingredients of K-Liquid Mixed Collagen Drink

Marine Collagen Peptide

The collagen is derived from deep sea fish sources with modern technology, its nano size molecules ease absorption and digestion of the body. It provides moisture and hydration to the skin. It also promotes hormone balance with its hydration reaction and skin tautness.

Strawberry Extract

Source of the strawberry extract or also known as 'polyphenol' is from Australia and produced with patented technology from Japan. Strawberry extract is rich with polyphenol, vitamin and nutritional folic acid. It acts as an anti-oxidant and helps the liver in the detoxification process.

Fruits Extract - Apple Extract and Apple Juice

K-Liquid Mixed Collagen Drink is enhanced with apple extract and apple juice which is rich with vitamin C, effective to help brighten the skin for glowing-looking skin as well as helps to improve absorption of collagen in the body.
