

$\pi$ -Water System

## 7 Star $\pi$ -water filtration system

The most advanced  $\pi$  Water System

Helps transform **Pipe Water** into  
**Healthy Drinking Water**

**7** Specially  
Designed Elements

Created by advanced Japanese technology

Low alkaline content, unplugged,  
and able to drink directly

## Water – The basis of healthy life

In the human body, 2/3 of it consist of water. And in order for it to function properly, we require water for the purpose of cell regeneration. Water is used to transport nutrients and oxygen to many different parts of the body. It also helps in the movement of bowels in the human body. That is why we require water for the body to perform normally.

At the same time, we need to drink 8 glasses of water daily to help ease cell regeneration of the body. However, in our busy and hectic daily lives, it is not easy to even drink a glass of clean water. It has been proven by scientists that the water we drink daily contains plenty of pollutants including heavy metals, toxins, chemical waste and many others that will affect our health.

Therefore in order to be **Healthy**, we not only have to drink **Clean** water but also consume **Healthy** water.

## Kidney – Natural filtration system of the human body

Our kidneys function as a natural filtration system in the body. If we do not use all water filtration system to filter the water that we drink, we will be depending on our kidneys for any filtration functions and processes. Therefore, we must beware that if any harm were to happen to our kidneys, we would be struck down with many serious diseases and ailments.

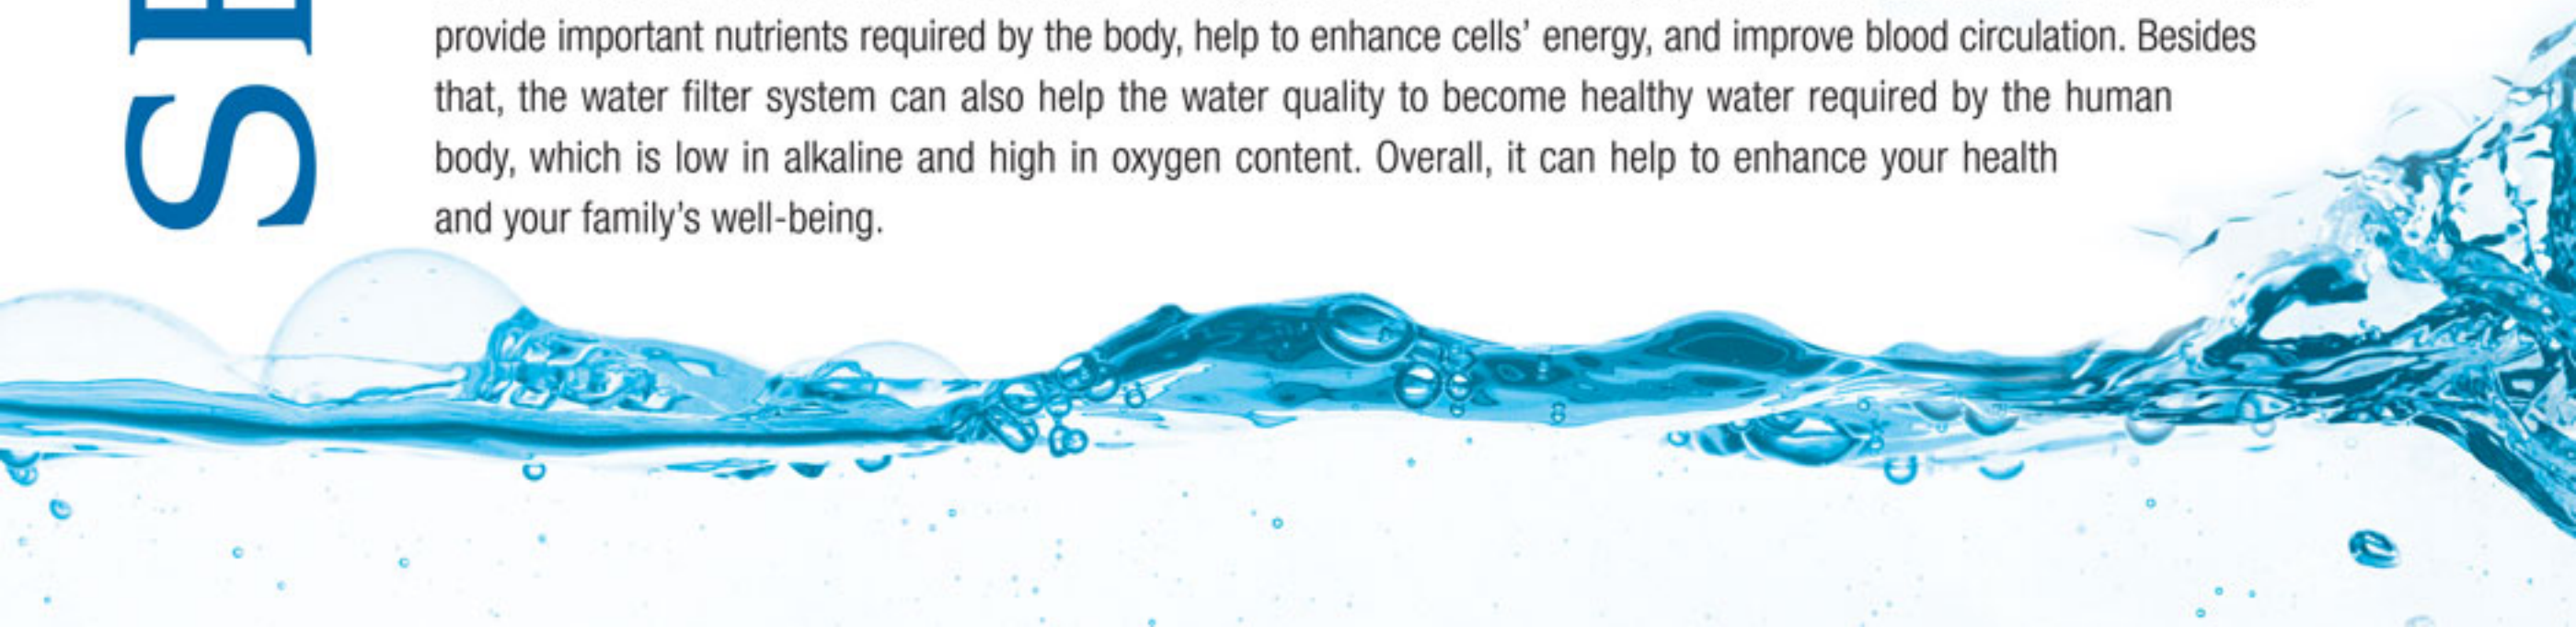

## Definitions of healthy water

The definitions of healthy water according to specialists :

- 💧 Clean and virus-free
- 💧 Small water molecule
- 💧 Chlorine free
- 💧 High penetrating power
- 💧 Energizing
- 💧 Low alkaline content
- 💧 Contain natural minerals
- 💧 Closest to living organic water

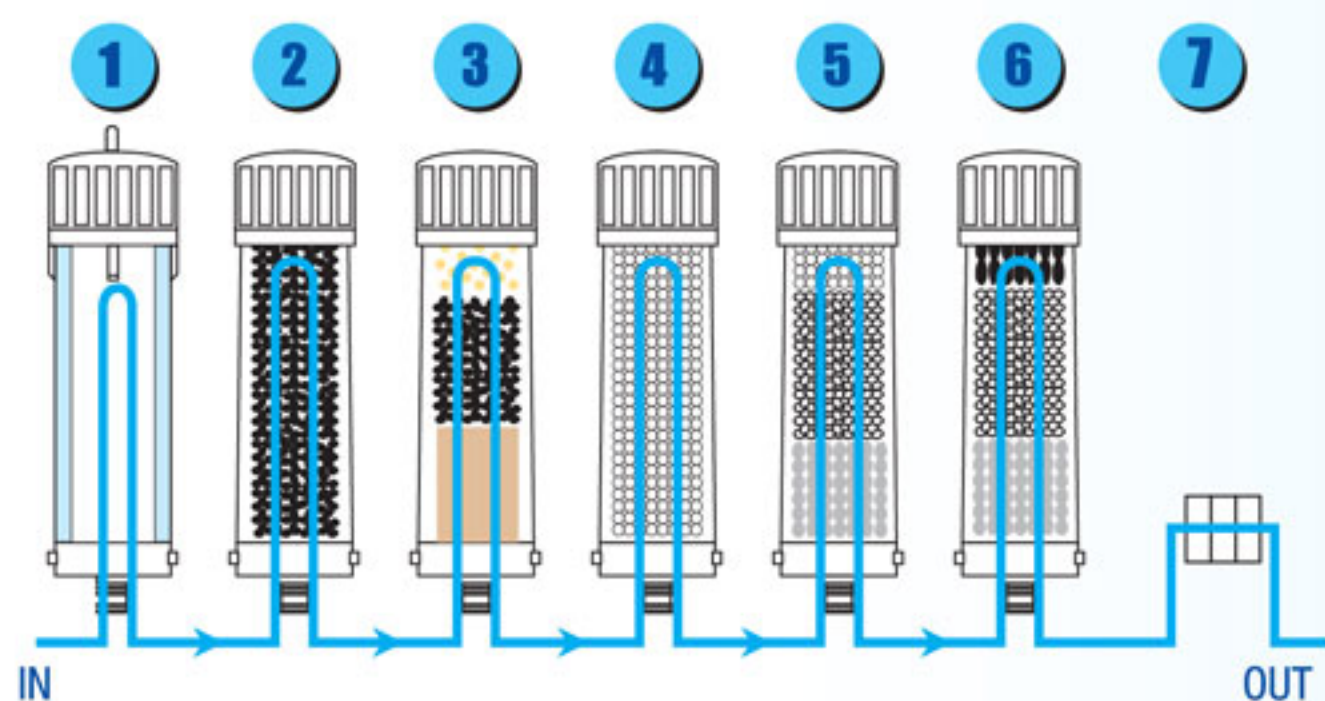

## SEVEN STAR™ Water Filtration System – the most advanced $\pi$ Water System

Using Japanese technology, the **SEVEN STAR™** Water Filtration System is capable of filtering up to 99.99% of toxins and waste, besides being able to filter chlorine, viruses, toxins, heavy metals and other harmful pollutants. The **SEVEN STAR™** Water Filtration System can also help to enhance the oxygen content of the water, allow water molecules to become smaller, provide important nutrients required by the body, help to enhance cells' energy, and improve blood circulation. Besides that, the water filter system can also help the water quality to become healthy water required by the human body, which is low in alkaline and high in oxygen content. Overall, it can help to enhance your health and your family's well-being.

## 7 Specially designed elements

The **SEVEN STAR™** Water Filtration System possesses 7 specially designed elements to help make water cleaner and improve the quality of water. With its advanced bio-technology filters, the **SEVEN STAR™** Water Filtration System can help to energize the content of water, turn water molecules smaller and provide one with natural and healthy water in the best possible condition.

### FILTER 1

- Sterasyl Ceramic

- The main content of the filter consists of diatom which is a natural material and does not contain any chemical composition. With its absolute filtration rating (defined as >99.99%) of 0.9 microns, sterasyl is highly effective against particulate contamination, pathogenic bacteria, cysts etc.

### FILTER 2

- Nano Silversol Activated Carbon
- KDF

- Absorbs taste and odour of organic compounds including chlorine and Benzene.
- Filter prohibits bacteria growth.
- Effectively removes harmful chemicals, various radioactive substances and heavy metals (aluminium, mercury...etc) the hazardous to our health.

### FILTER 3

- Activated Carbon Block

- Absorbs color, odour, toxic substances (chlorine, trihalomethanes, organic chemicals) and radioactive.

### FILTER 4

- Bio Ceramic Ball
- ORP Ball

- Contain more than 10 kinds of minerals.
- Produces a lot of negative ions with an increase in dissolvency of oxygen
- Improves the mild alkalinity pH of water and provides essential bio-mineral.
- For anti-oxidation effect.
- Breaks down water molecules into small fraction for better absorption and enriches the oxygen content of water.

### FILTER 5

- Energy Optimization Filter

- High density of multi-filtration elements combines absorption surface filtration and internal filtration to optimize the whole filtration process thus ensuring the water quality is hygienic, energized and oxygenated.

### FILTER 6

- Nanosol Activated Carbon Block

- Absorbs color, odour, toxic substances (chlorine, trihalomethanes, organic chemicals) and radioactive compounds.
- Excellent drinking water.
- Improves water taste.
- Simplifies water clusters
- Emits FIR

### ITEM 7

- Magnetizer

- Enhances and stabilizes the water molecules in small fraction.

# SEVENSTAR™ $\pi$ -Water System

## How to apply $\pi$ Water into your daily life?

1. **Drinking** :  $\pi$  Water can be consumed directly as drinking water, using it to make tea, coffee, milk and etc.
2. **Alcohol** :  $\pi$  Water can be consumed to neutralize the influence of alcohol.
3. **Cooking** :  $\pi$  Water helps to neutralize the pH of foods. It is best to use it for washing vegetables, to cook rice and to boil soup or noodles. It is not only delicious but can also help improve health.
4. **Eliminate stench from meat** : Soak meat in  $\pi$  Water for 20-30 minutes before cooking. It helps to eliminate the stench of blood from the meat.
5. **Retain freshness** : Soak fruits in  $\pi$  Water for 20-30 minutes before putting them inside refrigerator to help extend their lifespan.
6. **Planting** :  $\pi$  Water can improve the quality of plantation seeds. Use it for watering plants.
7. **Cleaning** : Clean your house with  $\pi$  Water. It can help eliminate dust and mould.
8. **Hair washing** : Act as hair treatment.
9. **Face washing** : Its small water molecule can easily penetrate into the skin, at the same time moisturizes and cleanses the skin.
10. **Healing** : Use  $\pi$  Water to wash damages caused by fire. It can also help avoid inflammation.
